I spoke at length with the resident calling EPA. She states she is a frequent visitor to council. She seems knowledgeable. She has many concerns, but I see them as 1) fire related, 2) demolition related, and 3) property related (see me previous email to DEP on which you were copied). She speaks about how she does not believe that anyone with environmental jurisdiction is overseeing the dismantling process. She believes this may result in releases that may effect the neighborhood. She lives very close and knows alot about the former operations and some of the personnel.

I am setting up a meeting with the owner to get a tour through the facility. I need to learn more about just how/who controls the demolition process. I am not sure if this is the fire service, code enforcement, etc. etc. Can you help me find the right persons ?

I think this resident will likely not be satisfied with the answers, but at least we can all say we coordinated.
